

# ZEPCAM Integration Solution: Genetec Clearance

The ZEPCAM bodycam solutions can now be easily integrated with the cloud-based evidence management software of Genetec. ZEPCAM Manager users are able to upload individual bodycam video files, including metadata, from ZEPCAM Manager into Genetec Clearance. This allows users to seamlessly incorporate ZEPCAM bodycam footage as evidence in cases within Genetec Clearance.

## Key Features

- ✓ Upload bodycam footage including metadata\* with ZEPCAM Manager, and combine them with evidence from other sources
- ✓ End-to-end security: capture, store, transfer, manage and forward bodycam footage
- ✓ Easy to integrate, intuitive to use with ZEPCAM Manager software
- ✓ View ZEPCAM bodycam GPS positions on the Genetec Clearance map

\*Metadata includes GPS, User ID, date and time

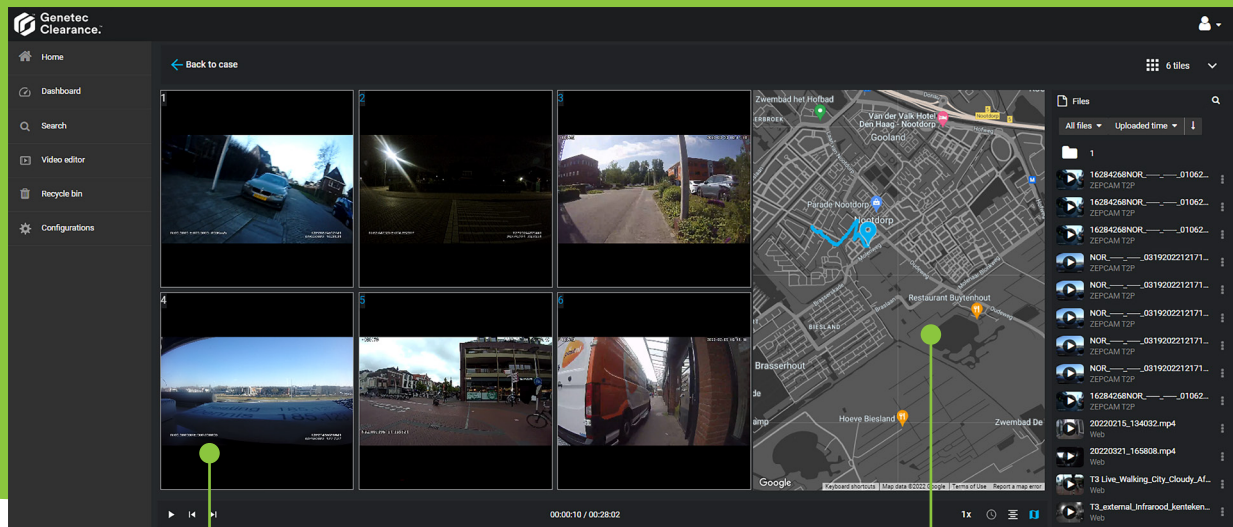

## Supports the work of frontline professionals in:

# How it works

The integration with Genetec Clearance is designed to be easy to use. With the Genetec Clearance integration for ZEPCAM Manager you can:

- Upload bodycam footage with metadata with ZEPCAM Manager at the click of a button
- View, manage and share ZEPCAM bodycam footage within Genetec Clearance
- Add bodycam footage to existing or new cases within Genetec Clearance
- Within ZEPCAM Manager create a new Genetec Clearance case and upload the case with bodycam footage

**ZEPCAM bodycam  
footage uploaded to  
Genetec Clearance**

**Bodycam GPS location  
displayed on the map  
(synchronised with footage)**

## Solution elements:

- ZEPCAM bodycam system: bodycams (T3 Live, T2+ bodycam), docking stations and software (Cloud)
- Genetec Clearance
